

# Enbridge Gas Inc. Notice of Study Commencement and Public Information Sessions

## Glendale Subdivision Community Expansion Project

Enbridge Gas Inc. (Enbridge Gas) is proposing to construct the Glendale Subdivision Community Expansion Project (the "Project") to supply the community of Glendale with cost-effective natural gas. The Project is proposed to be located in the Township of South Glengarry, Ontario.

The preliminary preferred route is approximately 5 kilometres (km) and connects to existing natural gas infrastructure on Purcell Road and travels north along Purcell Road, crosses Highway 401 and continues north into Glendale subdivision where a distribution pipeline travels along subdivision streets. This route includes station alteration works at the intersection of Boundary Road and Tyotown Road. Two alternate routes are also being considered for the project. Alternate Route 1 is approximately 7 km and connects to existing natural gas infrastructure on Boundary Road near SCM Way in the City of Cornwall, travels north and east on easements, crosses Highway 401, continues north to Glen Road and travels west along Glen Road and North on Boundary Road, also east along Glen Road into Glendale subdivision where a distribution pipeline travels along subdivision streets. This route includes new station works where the easement intersects with Glen Road. Alternate route 2 is approximately 6.8 km and connects to existing natural gas infrastructure on Boundary Road near SCM Way in the City of Cornwall. From there it travels north along Boundary Road and crosses Highway 401, then travels east along Glen Road into Glendale subdivision where a distribution pipeline travels subdivision streets. This route includes installation of a new station near the intersection of Boundary Road and Glen Road.

The proposed pipeline routes have been developed for the purposes of an assessment of potential environmental and socioeconomic impacts and do not represent the final project scope/design. For further details, please refer to the map.

As part of the planning process, Enbridge Gas has retained Stantec Consulting Ltd. (Stantec) to undertake an Environmental Study for the Project. The Environmental Study will fulfill the requirements of the Ontario Energy Board's (OEB) "Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Pipelines and Facilities in Ontario, 8th Edition (2023)". It is anticipated that an Environmental Report for the study will be completed in September 2024, after which Enbridge Gas will file an application to request an OEB Leave to Construct (LTC) for the Project. Should the OEB find the Project to be in the public's interest, construction is anticipated to commence in Q2 2025.

Consultation with Indigenous communities and engagement with landowners, government agencies, the public, and other interested persons is an integral component of the planning process. As such, two Information Session options will be held:

### In-person Public Information Session

April 23, 2024, 5:00 PM to 8:00 PM  
Cornwall Golf and County Club  
6740 Sutherland Avenue, Cornwall, ON

### Virtual Public Information Session

April 11, 2024 to April 25, 2024  
<https://www.solutions.ca/Enbridge-Glendale>

A copy of the Information Session story boards will be available for viewing on the Enbridge Gas project website provided below. A questionnaire will be available as part of the Information Sessions, and you will have the opportunity to provide comments and ask questions about the proposed Project. Input received during the Information Sessions will be considered in the route selection process and used to develop site-specific environmental protection and mitigation measures. Input and comments for the Project should be provided by **May 11, 2024**.

Should you have any questions or input regarding potential alternative routes (based on environmental concerns) or natural environmental features within the Study Area presented above, please contact the undersigned. Input will be evaluated and may be considered within the route evaluation portion of the Project.
