Home Fibre Optic Install

Crews have started installing fibre optic cables to improve high-speed Internet access in our area, thanks to recent provincial initiatives.

Homeowners may be approached by representatives from companies like Bell, Rogers, and Xplornet to request permission to install a fibre line from the road to your home at no cost. There's no obligation to subscribe to their services.

Representatives will make up to three in-person contact attempts:

2 weeks before construction

1 week before construction

First week of construction

If you do not respond or decline permission, the telecom company may not return for a free connection later.

Thank you for your cooperation as we work to enhance connectivity in our community!
